Safety Data Sheet

According to 29 CFR 1910.1200 (OSHA Hazard Communication Standard, 2024)

Version 2 · Date of preparation 2026-10-07

Section 1. Identification

Product identifier used on the label	Fmoc-Gln(Trt)-OH (product number 41011)
Other means of identification	Product number: 41011 Abbreviation: Fmoc-Gln(Trt)-OH
Recommended use of the chemical and restrictions on use	Recommended use: laboratory reagent; protected amino acid building block for peptide synthesis. For research and development use only. Restrictions on use: not for food, drug, household, pesticide or biocidal use.
Name, U.S. address, and U.S. telephone number of the chemical manufacturer, importer, or other responsible party	P3 BioSystems 270 Haven Hill Rd, Shelbyville, KY 40065 Telephone: +1 888-737-5598 Email: info@p3bio.com
Emergency phone number	+1 888-737-5598 (P3 BioSystems office line, business hours)

Section 2. Hazard identification

Classification of the chemical in accordance with paragraph (d)(1) of § 1910.1200, except for classification under paragraph (d)(1)(ii)	• Sensitization - skin, category 1 (including both sub-categories 1A and 1B)
Signal word, hazard statement(s), symbol(s) and precautionary statement(s) in accordance with paragraph (f) of § 1910.1200	**Signal word: Warning** Hazard pictograms: Exclamation Mark Hazard statements: • H317 May cause an allergic skin reaction. Precautionary statements: • P261 Avoid breathing dust. • P272 Contaminated work clothing must not be allowed out of the workplace. • P280 Wear protective gloves. • P302+P352 If on skin: Wash with plenty of soap and water. • P321 Specific treatment (see Section 4 of this SDS). • P333+P313 If skin irritation or rash occurs: Get medical advice/attention. • P362+P364 Take off contaminated clothing and wash it before reuse. • P501 Dispose of contents/container in accordance with local, state and federal regulations.
Hazards classified under paragraph (d)(1)(ii) of § 1910.1200	None identified.

Hazards not otherwise classified that have been identified during the classification process	None identified.
Where an ingredient with unknown acute toxicity is used in a mixture at a concentration ≥ 1% and the mixture is not classified based on testing of the mixture as a whole, a statement that X% of the mixture consists of ingredient(s) of unknown acute toxicity	Not applicable: the product is a substance, not a mixture.

Section 3. Composition/information on ingredients

Chemical name	(2S)-2-(9H-fluoren-9-ylmethoxycarbonylamino)-5-oxo-5-(tritylamino)pentanoic acid
Common name and synonyms	Nα-Fmoc-Nδ-trityl-L-glutamine; Na-Fmoc-Nd-trityl-L-glutamine; Fmoc-L-Gln(Trt)-OH; (2S)-2-(9H-fluoren-9-ylmethoxycarbonylamino)-5-oxo-5-(tritylamino)pentanoic acid.
CAS number and other unique identifiers	• CAS number: 132327-80-1 • InChIKey: WDGICUODAOGOMO-DHUJRADRSA-N • PubChem CID: 10919157
Impurities and stabilizing additives (constituents) which are themselves classified and which contribute to the classification of the substance	None known. The product is a single substance (purity ≥ 98.5% by HPLC, per specification). No impurity or additive is known to contribute to the classification.

Section 4. First-aid measures

Description of necessary measures, subdivided according to the different routes of exposure, i.e., inhalation, skin and eye contact, and ingestion	Inhalation: Move the person to fresh air. If not breathing, give artificial respiration. Get medical attention if symptoms occur. Skin: Take off contaminated clothing. Wash with plenty of soap and water. If skin irritation or rash occurs, get medical advice/attention. Wash contaminated clothing before reuse. Eyes: Rinse with plenty of water, also under the eyelids, for at least 15 minutes. Remove contact lenses if present and easy to do. Get medical attention if irritation persists. Ingestion: Rinse mouth with water. Never give anything by mouth to an unconscious person. Get medical attention if symptoms occur.
Most important symptoms/effects, acute and delayed	May cause an allergic skin reaction. Symptoms may include rash, itching and swelling. Allergic reactions can be delayed and can occur on later contact in persons already sensitized.
Indication of immediate medical attention and special treatment needed, if necessary	Treat symptomatically. A person who has developed an allergic skin reaction should avoid any further contact with the product.

Section 5. Fire-fighting measures

Suitable (and unsuitable) extinguishing media	Suitable: water spray, carbon dioxide, dry chemical, alcohol-resistant foam. Unsuitable: do not use a solid water jet.
Specific hazards arising from the chemical (e.g., nature of any hazardous combustion products)	Keep product and empty containers away from heat and sources of ignition. Thermal decomposition can release irritating gases and vapors. Hazardous combustion products: carbon monoxide, carbon dioxide and nitrogen oxides.
Special protective equipment and precautions for fire-fighters	Wear a NIOSH/MSHA-approved, pressure-demand self-contained breathing apparatus and full protective gear. Thermal decomposition can release irritating gases and vapors.

Section 6. Accidental release measures

Personal precautions, protective equipment, and emergency procedures	Use personal protective equipment (see Section 8), including gloves and eye protection; avoid skin contact. Avoid dust formation and do not breathe dust. Ensure adequate ventilation.
Methods and materials for containment and cleaning up	Sweep up and shovel the material, without creating dust, into suitable closed containers for disposal (see Section 13). Do not let the product enter drains.

Section 7. Handling and storage

Precautions for safe handling	Avoid contact with skin, eyes and clothing. Avoid formation of dust and do not breathe dust. Provide appropriate exhaust ventilation where dust is formed. Keep away from heat and sources of ignition; minimize dust generation and accumulation. Do not eat, drink or smoke when using this product. Wash hands thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace.
Conditions for safe storage, including any incompatibilities	Keep the container tightly closed. Store refrigerated (2–8 °C) in a dry place (per specification). Allow the container to warm to room temperature before opening. Incompatible materials: strong oxidizing agents, strong acids, strong bases.

Section 8. Exposure controls/personal protection

OSHA permissible exposure limit (PEL), ACGIH Threshold Limit Value (TLV), and any other exposure limit used or recommended by the chemical manufacturer, importer, or employer preparing the safety data sheet, where available	No OSHA PEL or ACGIH TLV has been established.

Appropriate engineering controls	Use with adequate ventilation; use local exhaust ventilation (e.g. a fume hood) where dust is generated. An eyewash station should be available where the material is stored or used.
Individual protection measures, such as personal protective equipment	Eyes/face: Safety glasses with side shields or chemical safety goggles (29 CFR 1910.133). Skin: Chemical-resistant gloves (e.g. nitrile rubber, minimum thickness 0.11 mm); inspect before use and remove without touching the outer surface. Wear a lab coat or other protective clothing to prevent skin exposure. Contaminated work clothing must not be allowed out of the workplace. Respiratory: Where dust is generated and ventilation is inadequate, use a NIOSH-approved particulate respirator (e.g. N95/P95), under a respiratory protection program meeting 29 CFR 1910.134. Hygiene: Wash hands before breaks and at the end of the workday. Do not eat, drink or smoke in work areas.

Section 9. Physical and chemical properties

Physical state	Solid (powder), per specification.
Color	White to off-white (per specification).
Odor (includes odor threshold)	No applicable information available. Odor threshold: no applicable information available.
Melting point/freezing point	Melting point: suppliers report 131–144 °C (measured) and 165–172 °C; not in the P3 specification.
Boiling point (or initial boiling point or boiling range)	No applicable information available.
Flammability	No applicable information available.
Lower and upper explosion limit/flammability limit	No applicable information available.
Flash point	No applicable information available.
Auto-ignition temperature	No applicable information available.
Decomposition temperature	No applicable information available.
pH	pH 5.4 at 22.9 °C (aqueous solution; concentration not stated).
Kinematic viscosity	Not applicable (solid).
Solubility	DMF: 0.3 g in 2 mL gives a clear solution (per specification). Water: 0.9 g/L at 20 °C.
Partition coefficient n-octanol/water (log value)	log Pow: 4.2 at 20 °C.
Vapor pressure (includes evaporation rate)	Vapor pressure: no applicable information available. Evaporation rate: not applicable (solid).
Density and/or relative density	No applicable information available.

Relative vapor density	Not applicable (solid).
Particle characteristics	Powder (per specification). No particle size data available.

Section 10. Stability and reactivity

Reactivity	None known, based on information available.
Chemical stability	Stable under recommended storage conditions.
Possibility of hazardous reactions, including those associated with foreseeable emergencies	No hazardous reactions known under normal processing. Hazardous polymerization does not occur.
Conditions to avoid (e.g., static discharge, shock, or vibration)	Heat, flames, sparks and other ignition sources; dust formation; contact with incompatible materials.
Incompatible materials	Strong oxidizing agents, strong acids, strong bases.
Hazardous decomposition products	Carbon monoxide, carbon dioxide and nitrogen oxides.

Section 11. Toxicological information

Information on the likely routes of exposure (inhalation, ingestion, skin, and eye contact)	Ingestion, skin contact, eye contact and inhalation of dust.
Symptoms related to the physical, chemical, and toxicological characteristics	Skin: may cause an allergic skin reaction (rash, itching, swelling). Eyes and respiratory tract: no data are available on irritation.
Delayed and immediate effects and also chronic effects from short- and long-term exposure	Delayed: skin sensitization; after sensitization, later contact with small amounts may cause an allergic skin reaction. Chronic: no data available. The toxicological properties have not been fully investigated.
Numerical measures of toxicity (such as acute toxicity estimates)	Oral LD50 (rat): > 2,000 mg/kg. Dermal LD50 (rat): > 2,000 mg/kg. Inhalation LC50: no data available.
Interactive effects; information on interactions should be included if relevant and readily available	No interactive effects are known.
Whether the hazardous chemical is listed in the National Toxicology Program (NTP) Report on Carcinogens (latest edition) or has been found to be a potential carcinogen in the International Agency for Research on Cancer (IARC) Monographs (latest edition), or by OSHA	Not listed by NTP, IARC or OSHA as a carcinogen.

When specific chemical data or information is not available, whether alternative information is used and the method used to derive the information (e.g., information from a class of chemicals rather than the exact chemical, using SAR)	No alternative (analog, class or SAR) information was used. The classification follows US and Canadian suppliers' safety data sheets for this substance; the skin sensitization classification rests on a guinea-pig test (OECD Test Guideline 406) reported by one of them. No other alternative information was used.

Section 12. Ecological information

Ecotoxicity (aquatic and terrestrial, where available)	Fish: LC50 (Danio rerio, zebra fish) > 100 mg/L, 96 h. May cause long lasting harmful effects to aquatic life.
Persistence and degradability	Not readily biodegradable (< 10%).
Bioaccumulative potential	No data available.
Mobility in soil	No data available.
Other adverse effects (such as hazardous to the ozone layer)	May cause long lasting harmful effects to aquatic life. Do not let the product enter drains.

Section 13. Disposal considerations

Description of waste residues and information on their safe handling and methods of disposal, including the disposal of any contaminated packaging	Dispose of contents and container in accordance with local, state and federal regulations, using a licensed waste disposal company. Chemical waste generators must determine whether a discarded chemical is classified as a hazardous waste (40 CFR Part 261). Dispose of contaminated packaging as unused product. Do not let the product enter drains.

Section 14. Transport information

US DOT: not regulated.

IMDG: not offered — P3 does not ship by sea.

IATA: not regulated.

UN number	See above: not regulated by any mode P3 ships by.
UN proper shipping name	See above: not regulated by any mode P3 ships by.
Transport hazard class(es)	See above: not regulated by any mode P3 ships by.
Packing group, if applicable	See above: not regulated by any mode P3 ships by.
Environmental hazards (e.g., Marine pollutant (Yes/No))	See above: not regulated by any mode P3 ships by.
Transport in bulk (according to IMO instruments)	Not applicable. P3 BioSystems does not ship this product in bulk or by sea.

Special precautions which a user needs to be aware of, or needs to comply with, in connection with transport or conveyance either within or outside their premises	None known.

Section 15. Regulatory information

Safety, health and environmental regulations specific for the product in question	TSCA: The chemicals shipped by P3 BioSystems are not subject to TSCA. SARA 302: no extremely hazardous substances. SARA 313: no components subject to reporting. SARA 311/312 hazard categories: Respiratory or skin sensitization. CERCLA: contains no substances regulated as hazardous substances (40 CFR 302). California Proposition 65: contains no Proposition 65 chemicals.

Section 16. Other information, including date of preparation or last revision

The date of preparation of the SDS or the last change to it	Date of preparation: 2026-10-07.

The information above is believed to be accurate and represents the best information available to P3 BioSystems on the date of preparation. It is provided for the safe handling of the product by trained persons in a laboratory and is not a warranty of any kind.
